SUMMARY

Data Analyst focused on BI at a digital products company, working on sales, social media and paid traffic reports, as well as lead segmentation and qualification. I build dashboards and reports from platform exports and spreadsheets, with documented metric rules, data audits and automated validation of the numbers. Associate degree in Systems Analysis and Development and a professional program in Data Analysis (EBAC), with projects in SQL, Python and AWS.

SKILLS

Analytics and BI: KPIs and business metrics, sales funnel, exploratory data analysis (EDA), dashboards and reporting, Looker Studio, descriptive statistics, machine learning basics (regression).

Data: SQL, Python (Pandas, NumPy, Seaborn), ETL, data quality and auditing, relational data modeling, Excel, Google Sheets.

Digital marketing: Meta Business Suite, TikTok Studio, paid traffic reporting (Meta Ads, Google Ads, TikTok Ads), lead segmentation and qualification.

Automation and tools: JavaScript, Node.js, REST APIs, Git and GitHub, GitHub Actions, automated testing, AWS (S3, Athena, Lambda), AI for data work (Claude Code).

Languages: Portuguese (native), English (technical: reading documentation).

EXPERIENCE

Data Analyst | Digital products company — 05/2026 – Present

- Standardized and streamlined the sales spreadsheet and built the team's first dashboard (there was none): goals by product and by salesperson, daily funnel per agent, lead income and automatic comparison with the previous period.
- Deliver the daily sales report and the weekly and monthly roll-ups, plus 3 to 7 social media reports per week for management and clients.
- Defined and documented the KPI rules (prorated goals, cross-sales, conversion rates) and built an audit that cross-checks the funnel reported by agents against recorded sales.
- Built Instagram and TikTok performance reports from platform exports, with automatic insights and PDFs delivered to clients.
- Built a pipeline that ingests Meta Ads, Google Ads and TikTok Ads exports, joins them with sales records in Google Sheets and delivers the paid traffic report with revenue and ROAS.
- Segment and qualify leads based on each request's criteria, using AI to speed up scripting, data preparation and pattern finding.
- Ensured reliable numbers with 2,000 automated tests and consistency checks.

PROJECTS

Dynamic Sales Report | public version of a work project — Demo | Code
Sales, goals and funnel dashboard with a SQL data model, REST API and an audit of agents' daily logs against sales.

Instagram and TikTok Performance Dashboards | public versions — Instagram | TikTok
ETL of Meta Business Suite and TikTok Studio exports, merged history, period comparisons only with complete data, automatic insights and PDF; CI with GitHub Actions (TikTok).

Telegram Data Pipeline (AWS) | EBAC — 10/2025
Daily ETL with API Gateway, Lambda, S3 (Parquet) and EventBridge: a bot's messages become SQL-queryable data.

E-commerce Analysis (Olist) | personal project — 03/2026
ETL and EDA in Python: sales, prices, order trends and the impact of delivery time on customer reviews.

EDUCATION

Data Analysis | Professional program (non-degree), EBAC — 06/2024 – 10/2025

Associate Degree in Systems Analysis and Development | UNINTER — 11/2018 – 05/2021
